PROFILE

Product Manager with a bachelor's degree in computer science (computer systems). On a live B2B marketplace (800+ suppliers, 20,000+ customers), I led the launch of online payments (CIB and Edahabia cards, bank transfer, cheque, wallet): 70–80% of B2B customers now pay digitally instead of cash on delivery. I turn business needs into a prioritised backlog and clear user stories. Looking for product roles in marketplaces, payments and logistics.

PROFESSIONAL EXPERIENCE

Product Manager **Mar 2026 – Present**
Maystro Delivery (Okadoo) *Algiers, Algeria*

- **Online payments:** led end to end, from requirements gathering to integration and rollout (CIB and Edahabia cards, bank transfer, cheque, Okadoo Wallet). 70–80% of B2B customers now pay digitally.
- **Automatic B2B billing:** generation of the full document chain (pro forma invoice, supplier purchase order, final invoice, delivery note, credit note for partial or full returns).
- **Exchanges and refunds:** one system covering the customer marketplace, the supplier space and the admin back office.
- **AI catalogue import** (PDF, Excel or the supplier's website, with automatic completion of product data and images) and **supplier subscriptions**.
- Backlog management, PRDs and user stories with acceptance criteria, running sprints with 6 developers and 1 product designer. Raised sprint delivery from about 50% to nearly 80% through structured planning and dependency tracking.

Product Manager, Learning Platform **Oct 2025 – Mar 2026**
Higher Institute of Sciences (HIS) *Algiers, Algeria*

- Owned the institute's Moodle platform from requirements to implementation and deployment, working with instructors, administration and students.
- Translated user needs into functional requirements, structured tasks and acceptance criteria.
- Designed and built courses, assessments, SCORM packages and interactive H5P content for 600 students and 20 instructors.

Digital Project Manager (Contract) **Aug 2025 – Sep 2025**
HiveDigit, digital agency *Algiers, Algeria*

- Led client web projects from discovery and planning to launch, on scope, on time and to quality.
- Gathered and validated requirements with clients and internal teams; wrote structured documentation and Figma wireframes.
- Introduced a design-to-development handoff with annotated prototypes, cutting back-and-forth between designers and developers.

UI/UX Designer Intern, *Go (ex Goubba), Algiers* **Jul 2023 – Aug 2023**

- Designed TicketsResto from the ground up, contributing to its market launch.
- Modernised the user experience on several projects with responsive design.
- Sped up the design workflow with Locofy, reducing production time.

Full-Stack Developer Intern, *Gen42, Algiers* **Jul 2022 – Sep 2022**

- Built front-end and back-end features (MongoDB, Express.js, React, Node.js) on production applications.
- Took part in Agile ceremonies (sprint planning, stand-ups, reviews) within a professional team.

PROJECTS

Bayti, *multi-role real-estate platform* · github.com/Fares00T/Bayti-real-estate-website

- Designed and built end to end a platform for buyers and renters, agencies, private sellers and an administrator with a dedicated dashboard.
- Multi-criteria search (price, location, bedrooms…), interactive map and a viewing-request workflow that agencies accept or decline.
- Role-based authentication, listing management and a data model built to scale. Stack: React, Node.js, Express.js, MySQL, Prisma, Figma.

EDUCATION

Bachelor's Degree in Computer Science, Computer Systems **Oct 2022 – Jul 2025**

Higher Institute of Sciences (HIS) *Algiers, Algeria*

- Key modules: communication networks, computer security, operating systems, computer architecture.

Erasmus+ Exchange Semester, Computer Science **Oct 2024 – Feb 2025**

Silesian University of Technology (Politechnika Śląska) *Gliwice, Poland*

- ECTS-weighted average 4.36 / 5.0. Project manager of a six-person team on *Commercify*, an e-commerce prototype: requirements gathering and UML design.

SKILLS AND LANGUAGES

Product management: backlog management and prioritisation, user stories and acceptance criteria, PRDs, roadmap, Scrum (sprint planning, reviews, retros), functional testing

Payments and fintech: card payments (CIB, Edahabia), bank transfer, wallet, invoicing and credit notes, refunds
